

Ideation Phase

Define the Problem Statements

Date: 18 June 2026

Team ID: VIPC2-MERN-CHETHULA HARISH

Project Name: Book A Doctor – Online Doctor Appointment Booking System

Problem Statement (PS-1)

Field	Description
I am (Customer)	A patient seeking medical consultation
I'm trying to	Book an appointment with a doctor quickly and conveniently
But	I have to visit hospitals physically or make multiple phone calls
Because	There is no centralized online appointment booking system available
Which makes me feel	Frustrated, delayed, and uncertain about appointment availability

Problem Statement (PS-2)

Field	Description
I am (Customer)	A doctor managing daily patient appointments
I'm trying to	Organize and manage appointment requests efficiently
But	Appointment scheduling is handled manually and often leads to conflicts
Because	There is no automated system to manage patient appointments and notifications

Which makes me
feel

Overloaded, inefficient, and unable to manage appointments
effectively

Conclusion

The identified problem statements highlight the challenges faced by both patients and doctors in traditional appointment management systems. The Book A Doctor platform aims to address these issues by providing a secure, efficient, and user-friendly online appointment booking solution.
