Project Name: Book A Doctor – Online Doctor Appointment Booking System

Empathy Map Canvas

User Personal

Patient seeking medical consultation and appointment booking services

THINKS

- Is the doctor available today?
- Can I book an appointment quickly?
- Is my personal information secure?
- Will my appointment be confirmed on time?
- Can I avoid waiting in long queues?

FEELS

- Frustrated by long waiting times.
- Worried about health issues.
- Anxious about appointment confirmation.
- Happy when appointments are booked easily.
- Confident when receiving timely updates.

SEES

- Crowded hospitals and clinics.
- Long queues at registration counters.
- Limited information about doctor availability.

- Increasing use of digital healthcare services.

SAYS

- I need a doctor appointment immediately.
- I want a simple booking process.
- I need updates about my appointment.
- I don't want to spend hours waiting.

DOES

- Searches for doctors online.
- Compares available doctors.
- Books appointments through websites/apps.
- Checks appointment status regularly.
- Uses mobile devices for healthcare services.

PAINS

- Long waiting times.
- Difficulty finding available doctors.
- Lack of appointment tracking.
- Communication delays.
- Manual booking procedures.

GAINS

- Easy online appointment booking.
- Real-time appointment updates.
- Faster access to healthcare services.
- Better communication with doctors.
- Improved overall healthcare experience.

Summary

The empathy analysis shows that patients need a simple, secure, and efficient platform for booking doctor appointments. The Book A Doctor system addresses these needs by providing online appointment booking, doctor search functionality, appointment tracking, and real-time notifications.
