

Project Design Phase

Problem – Solution Fit Template

Date: 18 June 2026

Team ID: VIPC2-MERN-CHETHULA HARISH

Project Name: Book A Doctor – Online Doctor Appointment Booking System

Customer Segment

- Patients seeking medical consultation
 - Doctors managing appointments
 - Healthcare administrators
-

Customer Problems

Problem 1

Patients face long waiting times and manual appointment booking procedures.

Problem 2

Patients have difficulty finding available doctors and appointment slots.

Problem 3

Doctors and hospitals struggle to manage appointments efficiently.

Problem 4

Lack of appointment tracking and timely notifications.

Existing Alternatives

- Direct hospital visits
 - Phone call appointment booking
 - Manual register maintenance
 - Third-party appointment services
-

Proposed Solution

The Book A Doctor platform provides a centralized online appointment booking system where:

- Patients can search doctors and book appointments.
 - Doctors can manage appointment requests.
 - Administrators can approve doctors and monitor activities.
 - Users receive real-time appointment notifications.
-

Key Benefits

- Faster appointment scheduling
 - Reduced waiting time
 - Better doctor availability management
 - Improved communication
 - Secure and centralized data management
-

Problem – Solution Fit

Customer Problem	Proposed Solution
Long waiting times	Online appointment booking
Difficulty finding doctors	Doctor search and availability listing
Manual appointment management	Automated appointment workflow
No appointment tracking	Real-time status updates and notifications

Conclusion

The Book A Doctor platform effectively addresses the major challenges faced by patients and healthcare providers. The proposed solution directly aligns with user needs and improves the overall healthcare appointment management process.
